

## Monumental Partners with Alchemic Dream to Offer Management, Events, Customer Support and Localisation Services

**Nottingham, UK. 28 February 2008** - Online Games specialist Alchemic Dream, Inc is proud to announce its partnership with Online Game, Virtual World and Technology Developer Monumental Games.

Alchemic Dream, Inc. offers a set of services to publishers, designed toward one unique goal and two different approaches. Modern MMO players only want to play the most accessible and best supported games, and at the same time publishers and developers want to facilitate access to their product and increase retention rates.

"By partnering with Monumental Games, we are sure that future MMOs developed with the Monumental Technology Suite will take both players and publishers expectations into consideration regarding accessibility and support." said Stephane Jankowski, General Manager of Alchemic Dream. "In the end, everybody wins".

The Monumental Technology Suite (MTS) is a complete suite of tools that allows organisations to develop Virtual Worlds and Online Games for a wide range of applications (including computer based training (CBT), entertainment, corporate intranets, and collaborative environments). Alchemic Dream, Inc. brings its customer care expertise to this partnership to help Monumental Games offer the best solution possible to developers.

"At Monumental we realise that the development, launch and ongoing operations of an MMO goes beyond the underlying technology itself," said Paul Mayze, Business Development Director for Technology at Monumental. "Alchemic Dream's specialist skillset fits in well alongside our roster of existing partners that include best-of-breed billing, VoIP and hosting solutions."
